EXECUTIVE SUMMARY

Aspiring Backend Developer and BCA student with a strong foundation in Python and web development. I enjoy building practical applications, solving problems, and learning new technologies through hands-on projects and real-world experience. Through academic projects and internships, I have developed skills in backend development, API integration, and software development. I am eager to contribute to meaningful projects, continue growing as a developer, and build reliable software solutions.

EDUCATION

Bachelor of Computer Applications (BCA)
Jamal Mohamed College, Tiruchirappalli
CGPA: 8.7/10

2024 - Present

Pallapatti Hr. Sec. School, Pallapatti,
2019 - 2024

Crescent Matric Hr. Sec. School, Pallapatti.
2010 - 2019

TECHNICAL SKILLS

Programming Languages

- Python

Backend Framework

- Django
- Django REST Framework (DRF)

Database Query Language

- SQL (MySQL, SQLite, PostgreSQL, SSML)

Tools & Platforms

- Git
- GitHub
- VS Code
- Postman

LANGUAGES

- English
- Tamil

INTERNSHIP EXPERIENCE

Python Full Stack Development Intern | CodeBonding Technology | May 2026

Completed a Python Full Stack Development internship at CodeBonding Technology, where I worked on developing a real-time AI-powered chat application. During the internship, I gained hands-on experience in backend development, API integration, application testing, and software development workflows. This experience strengthened my understanding of building practical web applications and applying Python development skills in real-world projects.

Live Internship Project : <https://novaai-lake.vercel.app/login> 

RPA Intern | Skywin Academy, Tiruchirappalli | March 2026

Completed an internship in Robotic Process Automation (RPA) at Skywin Academy, where I learned the fundamentals of business process automation and workflow optimization. Through practical activities and guided projects, I gained exposure to automation concepts and developed an understanding of how automated solutions can improve efficiency and reduce repetitive manual tasks.

PROJECTS

Nova AI Chat Application

Developed an AI-powered chat application that enables users to interact with an intelligent chatbot through a modern and responsive interface. Implemented backend functionality, API integration, and real-time communication features to deliver a seamless user experience. The project strengthened my skills in web development, backend integration, and AI-powered applications.

Live Link : <https://novaai-lake.vercel.app/login> 

E-Commerce Web Application

Built a full-stack e-commerce web application with features such as product management, user authentication, and database integration. Developed both frontend and backend components to provide a smooth shopping experience while improving my understanding of web application architecture and backend development.

Live Link : <https://tech-hub-blue-six.vercel.app/> 

Blog Application

Created a blog platform that allows users to create, manage, and interact with content through a user-friendly interface. Implemented authentication, content management functionality, and database operations, gaining practical experience in full-stack web development and CRUD operations.

Additional Projects Completed several academic and personal projects, including a Student Dashboard System, Chess Game, Rock Paper Scissors Game, Portfolio Website, and other Python-based applications. These projects strengthened my programming, problem-solving, debugging, and software development skills. For additional project details, live demonstrations, and source code repositories, please visit my portfolio website.

CERTIFICATIONS

- Python Full Stack Development Internship CodeBonding Technology (2026)
- Robotic Process Automation (RPA) Internship – Skywin Academy (2026)
- SQL (Intermediate) Skill Certification – HackerRank (2025)
- Python Django 101 – Simplilearn SkillUp (2026)
- Python Course for Beginners: Mastering the Essentials – Scaler Topics (2025)
- Additional certifications in Python, NumPy, Pandas, Power BI, Tableau, SQL, and Business Analytics are available on my portfolio website for verification.

ACHIEVEMENTS

- Served as a Student Volunteer at JAMAL EXPO 2025 (Platinum Jubilee Exhibition) organized by Jamal Mohamed College, contributing to event coordination, teamwork, and the successful execution of one of the institution's major academic events.
- Secured Runner-Up (2nd Place) in the Debugging Event (Winterfell's Watch) at HEBCOSS 2K26, a National Level Technical Symposium organized by Bishop Heber College, Tiruchirappalli, demonstrating strong problem-solving, logical thinking, and debugging skills in a competitive environment.
- Built and deployed multiple real-world projects, including an AI Chat Application, E-Commerce Web Application, Blog Platform, Student Dashboard System, Chess Game, and Portfolio Website, strengthening practical software development and backend engineering skills.

INTERESTS

Passionate about Backend Development, Software Engineering, Artificial Intelligence, and Web Application Development. Interested in solving real-world problems through technology and continuously learning new tools and technologies to improve my development skills.
