Career Objective

I am a Backend Developer focused on building clean, scalable, and efficient web applications using Django and Python. I enjoy solving real-world problems through structured backend logic and well-designed systems.

Currently, I am strengthening my expertise in Django by building practical projects, implementing authentication systems, database relationships, and improving application architecture. My goal is to become a strong backend engineer capable of designing reliable and production-ready systems. I believe in learning by building, improving step by step, and focusing on fundamentals over shortcuts.

Technical Skills

Programming

- Python (Core concepts, OOP, Functions)

Framework

- Django (CRUD operations, Authentication, Forms, Templates)

Databases

- SQL (Basic queries, Joins, CRUD operations)

Web Basics

- HTML & CSS (Basic structure and styling)

Tools

- Git & GitHub

Concepts

- REST API (Basics)
- Request-Response Cycle

Soft Skills

- Problem-Solving
- Analytical Thinking
- Communication

Languages

- Tamil
- English

Education

Bachelor of Computer Applications (BCA)
Jamal Mohamed College, Tiruchirappalli
2024 - Present

Pallapatti Higher Secondary School
2019 - 2024

Crescent Matriculation Higher Secondary
School
2010 - 2019

Achievements & Activities

- Selected among top teams in a college-level **Debugging Competition**, showcasing strong logical thinking and code debugging ability.
- Participated in two recognized **World Record events under JAMAL World Records**, contributing as an active team member.
- Represented school in football tournaments, demonstrating teamwork, discipline, and leadership skills, and Participated in a **State-Level Football Competition**,

Projects

JAMAL – AI Voice Assistant (Python)

Developed an AI-powered voice assistant with a futuristic UI for JAMAL 2K25 Expo. The assistant processes natural voice commands to automate web searches, play YouTube videos, open websites, and launch desktop applications.

Technologies: Python, SpeechRecognition, Web Automation, OS Automation

GitHub  : <https://github.com/MAFAZ9416/project> 

Blog Web Application (Django)

Built a dynamic blog application to practice real-world backend development. Implemented user authentication, CRUD operations, form validation, secure password handling, and dynamic template rendering.

Technologies: Django, Python, SQL, HTML, CSS
